Before we get started

This session is being recorded - a follow-up will be sent

Submit questions in the chat.
We have plenty time for Q&A

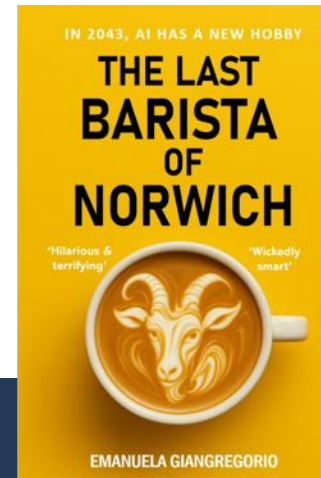

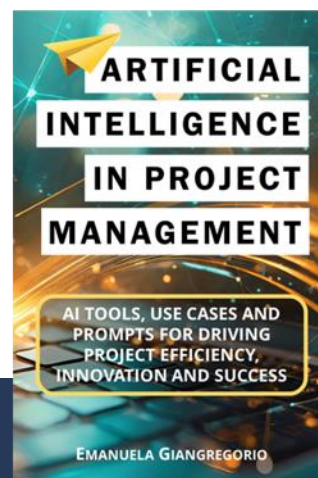

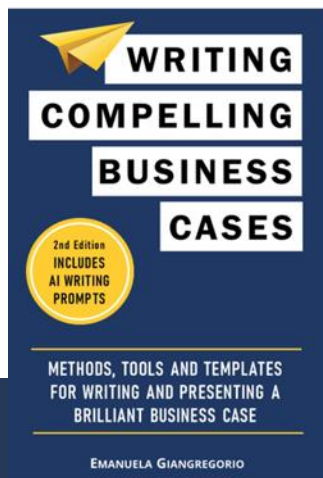

Your feedback is welcome and valuable.
Send us an email after😊

Agenda

1. Introduction to the scheme owner
2. Why AIPGF now
3. Overview of the AIPGF
4. Who is the AIPGF for - target audience
5. Certification scheme
6. Q&A

Scheme owner - Emanuela Giangregorio

- **Started career in governance** (internal audit)
- **20+ years** as a management consultant and project management coach.
- **Clients across industries worldwide:** blue chips, international NGOs, UK government and small organisations.
- Visiting lecturer at business schools and external verifier for the **triple crown EM Normandie Business School**.
- Prior to AIPGF, helped clients use **AI in projects and programmes**.

Poll 1

Are you or your organisation using AI tools in project management?

Agenda

1. Introduction to the scheme owner
- 2. Why AIPGF now**
3. Overview of the AIPGF
4. Who is the AIPGF for - target audience
5. Certification scheme
6. Q&A

SO MANY AI CERTIFICATIONS ALREADY!!!

Why is a Governance Framework needed for AI-Assisted projects?

- **Projects** are the **PRIMARY** mechanism for operationalising an organisation's strategy, and **Project Management** remains one of the few **skills relevant to MOST** business professionals (more than 70%).
- **AI adoption in projects is increasing exponentially**, with little to no governance.
- **Governance** of how **AI** is used in **projects** is getting more attention and will soon be a **board-level mandated requirement**.
- **Before AIPGF, NO guidance** on HOW TO **PRACTICALLY** implement AI governance in projects.

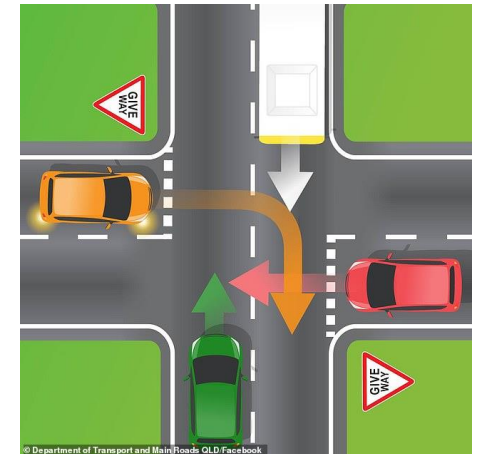

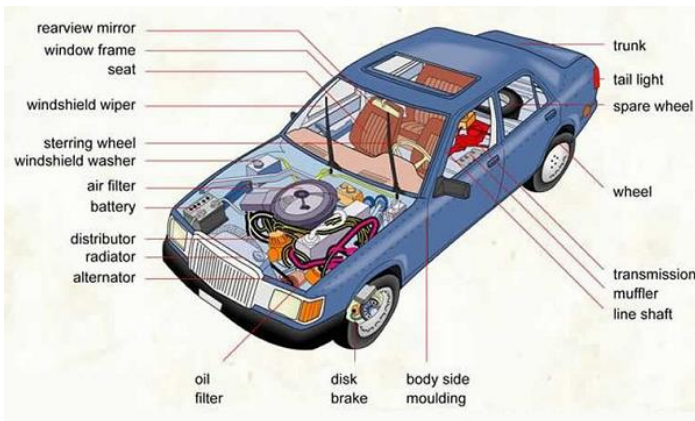

ISO24k v AIPGF v AI PM Training?

ISO24k is like a global best practice standard providing rules for any means of transportation.

The **AIPGF** teaches you the traffic laws and road safety specifically for driving cars (any type of car), ensuring safe and responsible driving.

AI PM training: Learning how to use AI tools in projects is like learning how to operate specific types of cars. With AI, the tools are constantly changing, difficult to keep courses up to date.

Why is a Governance Framework needed for AI-Assisted projects?

Increasing regulations like **EU AI Act** and **ISO standards** driving demand for structured AI governance. **AIPGF** shows practically “**how to**” in project environments.

Evidence of AI governance in project management will be a **competitive differentiator** (talent attraction, stakeholder trust, personal career advancement).

Organisations are already hiring hybrid roles that **combine AI governance** with **project management**.

Poll 2

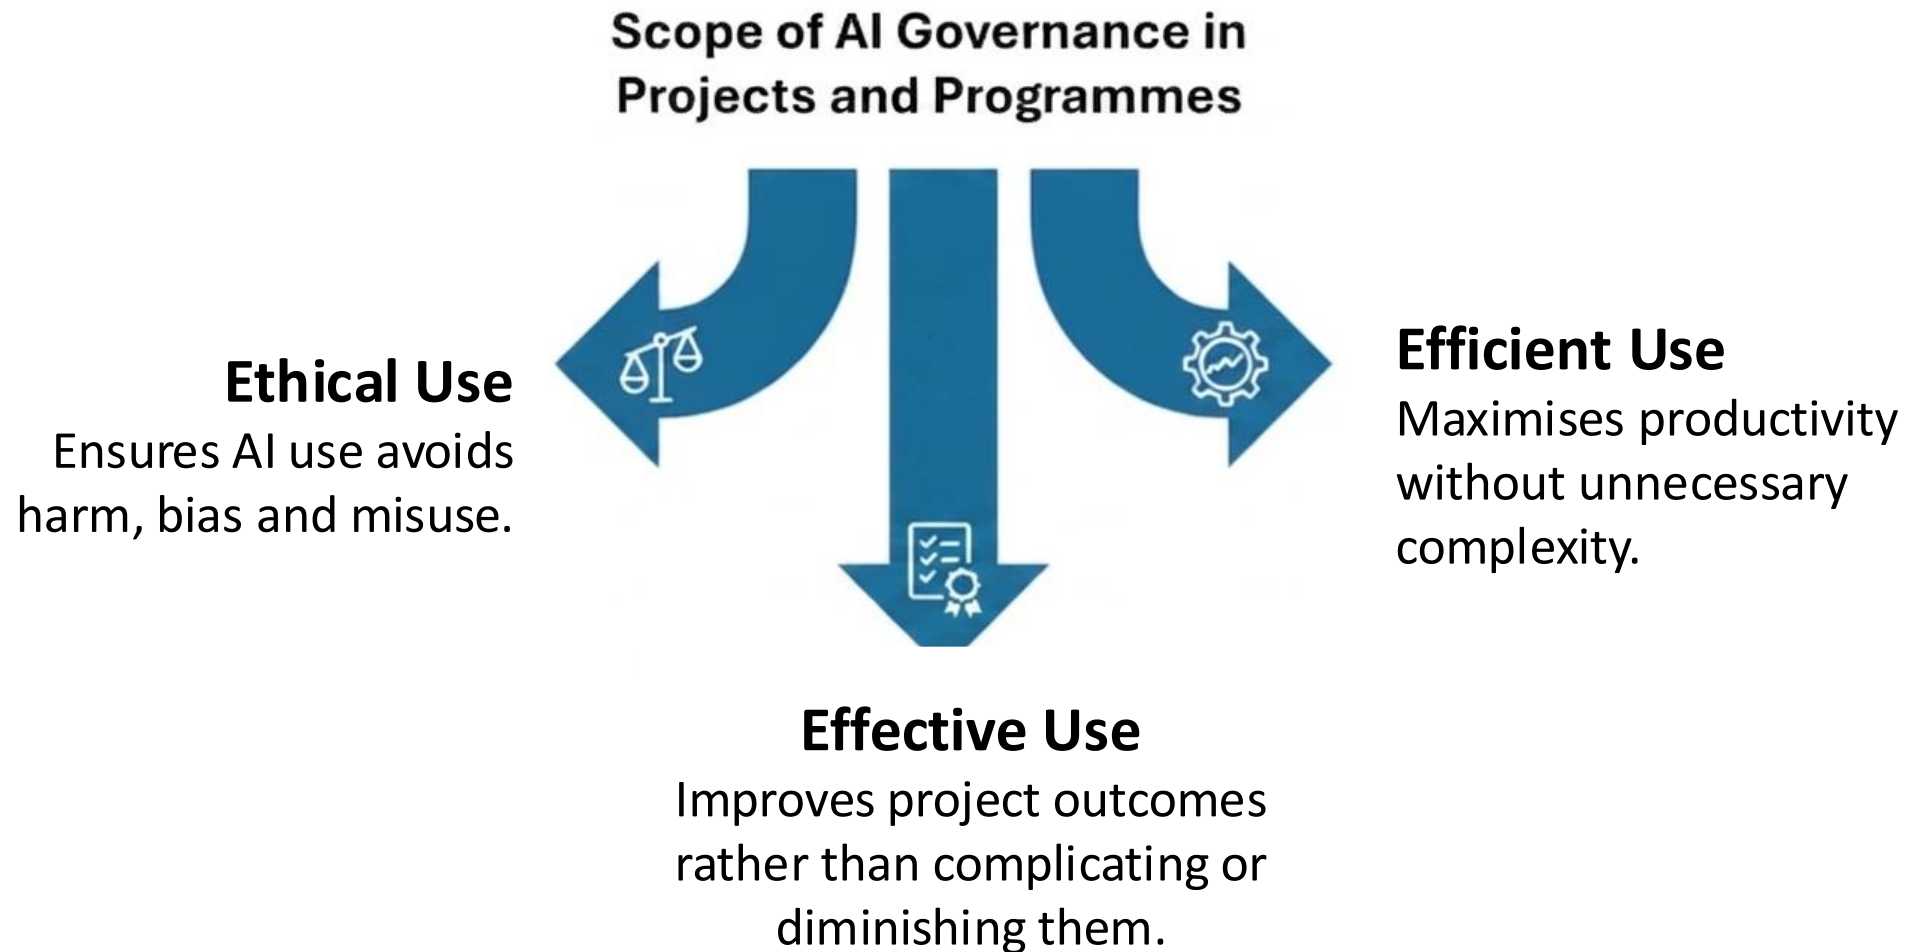

If your organisation was audited today, would they be able to demonstrate that **every AI use in projects is purposefully planned, monitored and evaluated?**

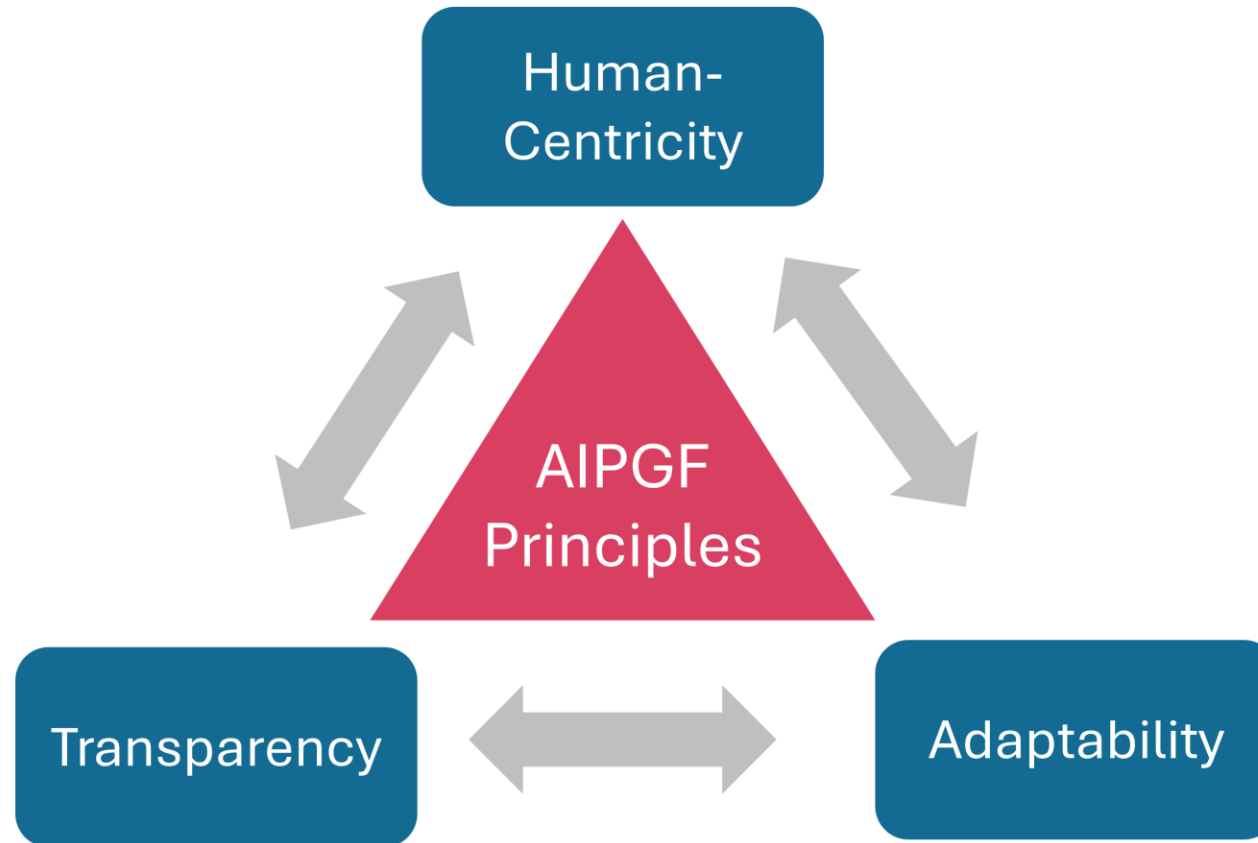

Agenda

1. Introduction to the scheme owner
2. Why AIPGF now
- 3. Overview of the AIPGF**
4. Who is the AIPGF for - target audience
5. Certification scheme
6. Q&A

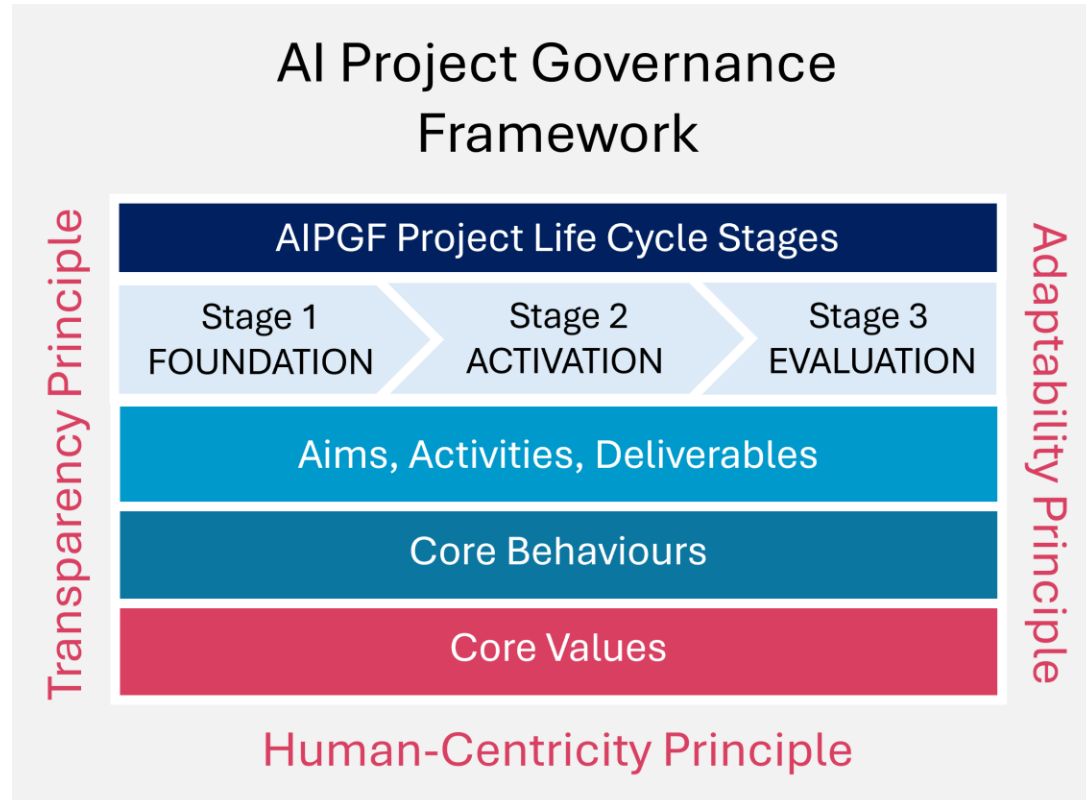

Scope of “Governance”

AIPGF overview

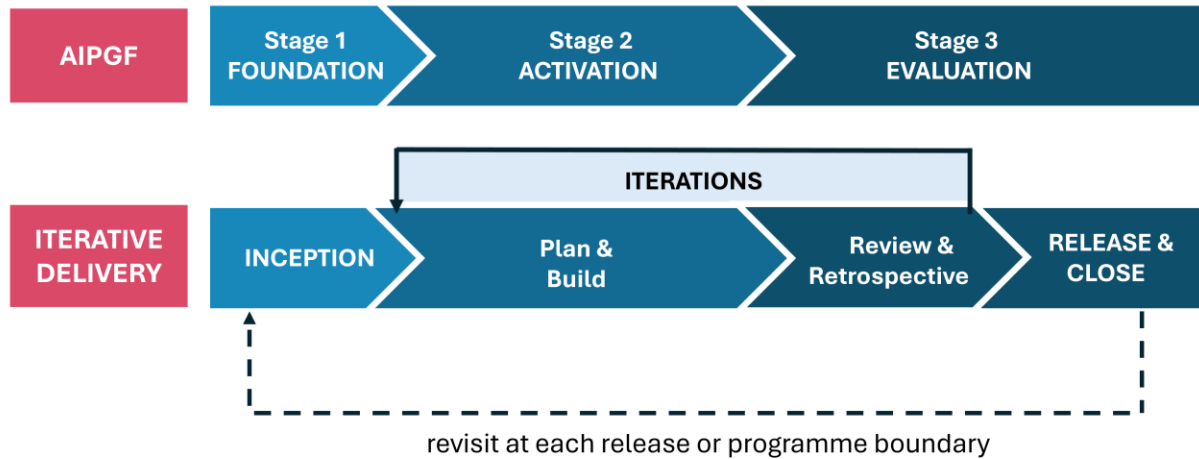

AIPGF overview

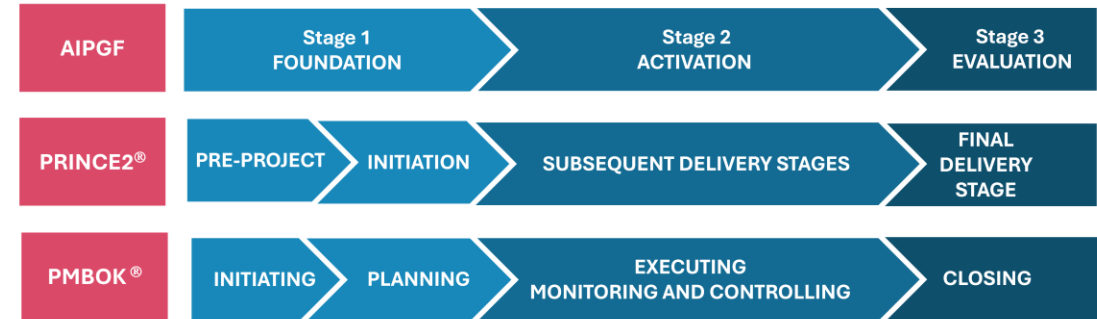

AIPGF overview

Easily integrates with existing project management approc or approaches, such as **Agile**, **PRINCE2**, **PMBOK** or hybrid approaches.

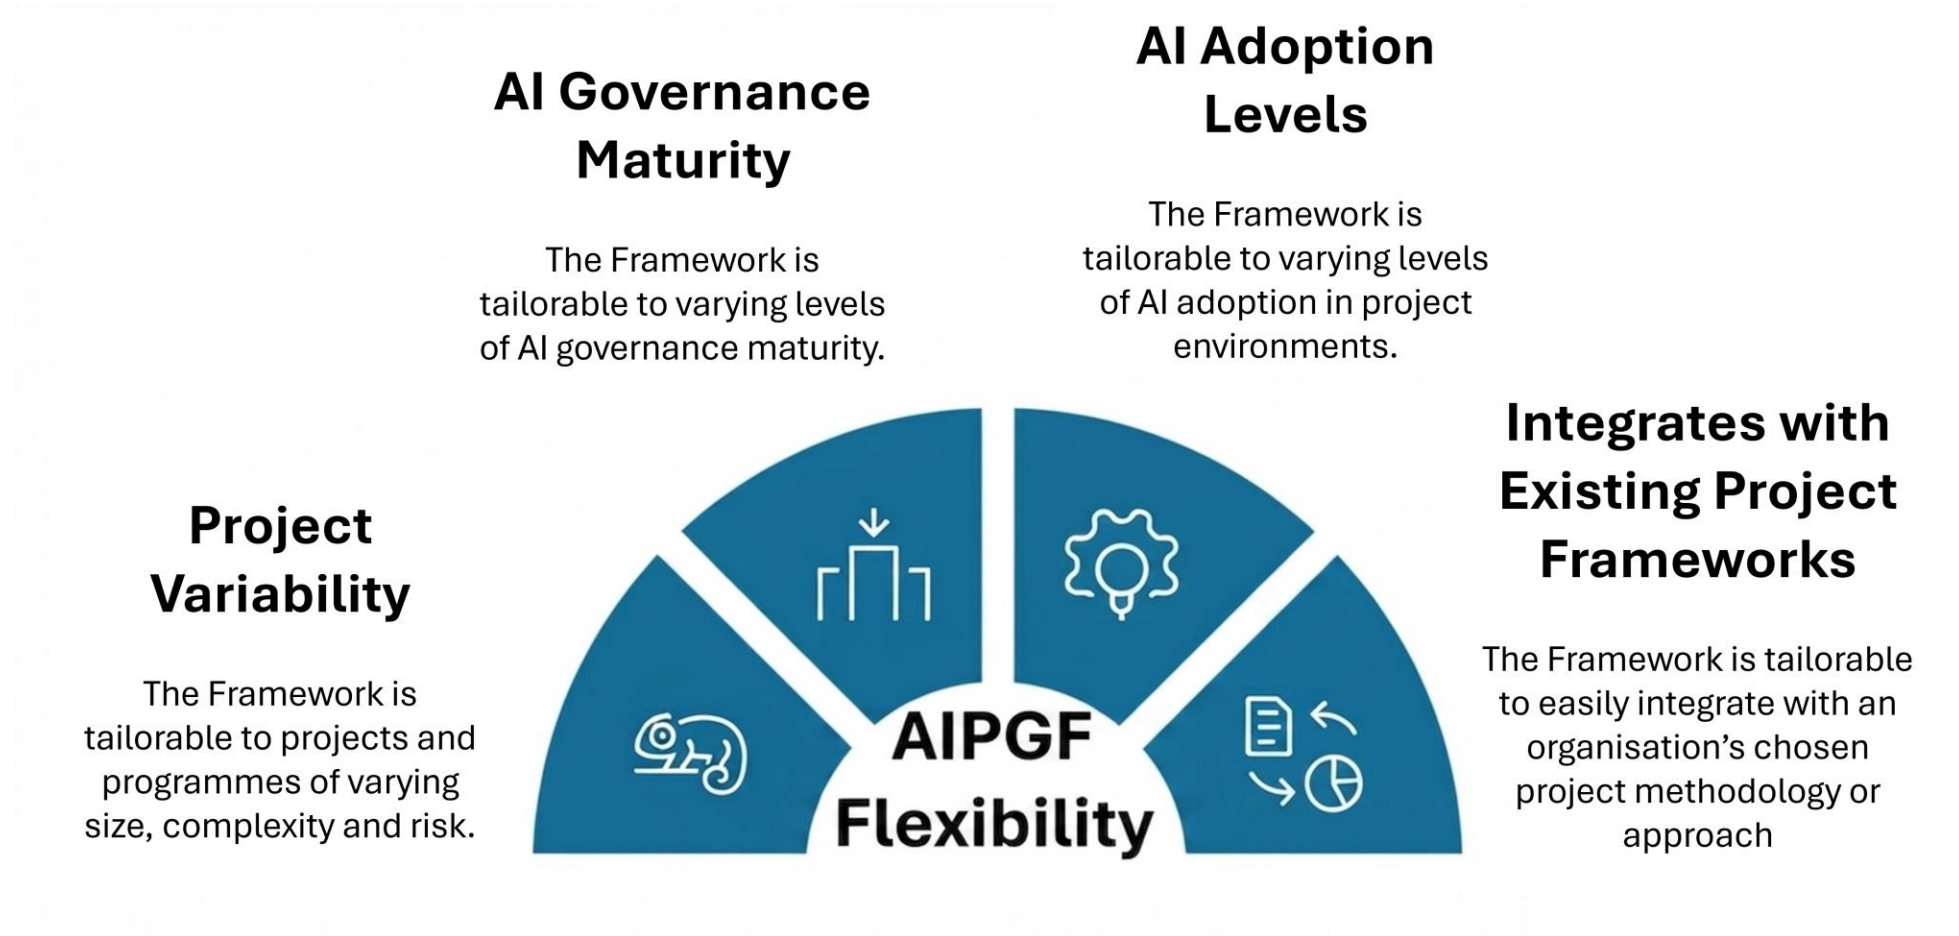

Iterative Delivery Mapped to AIPGF

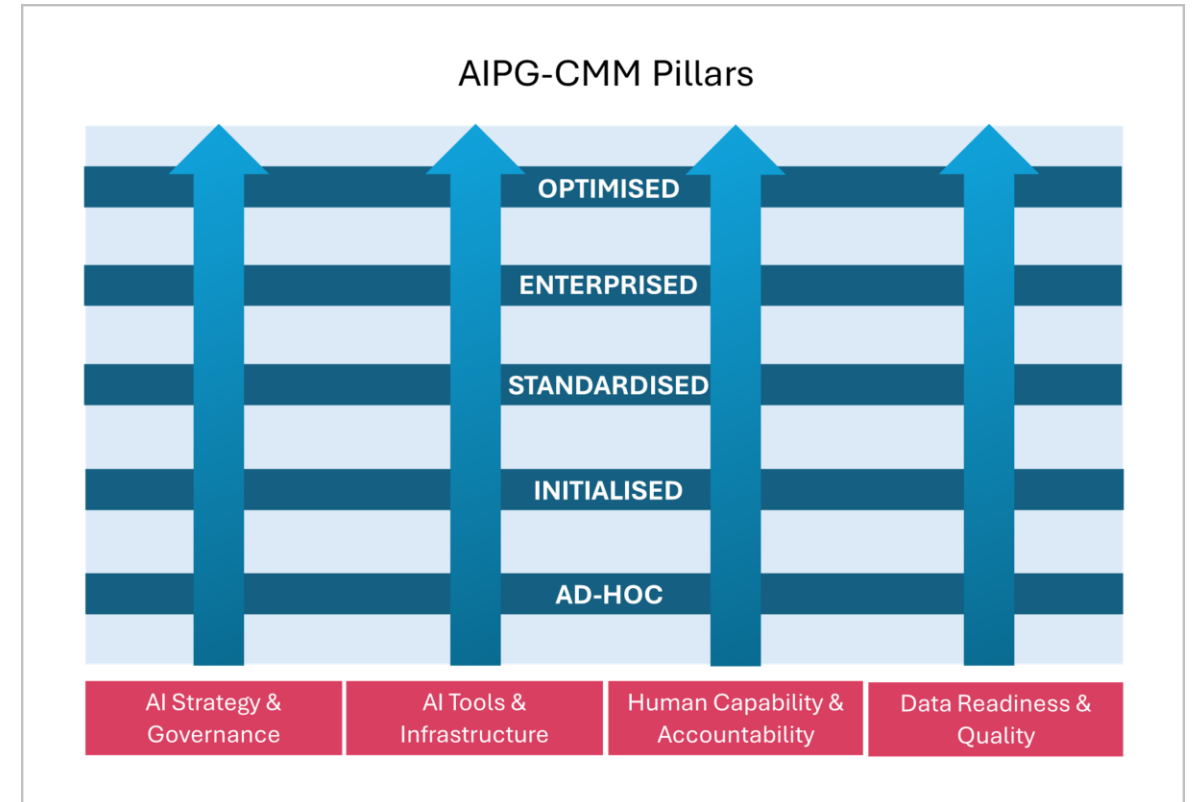

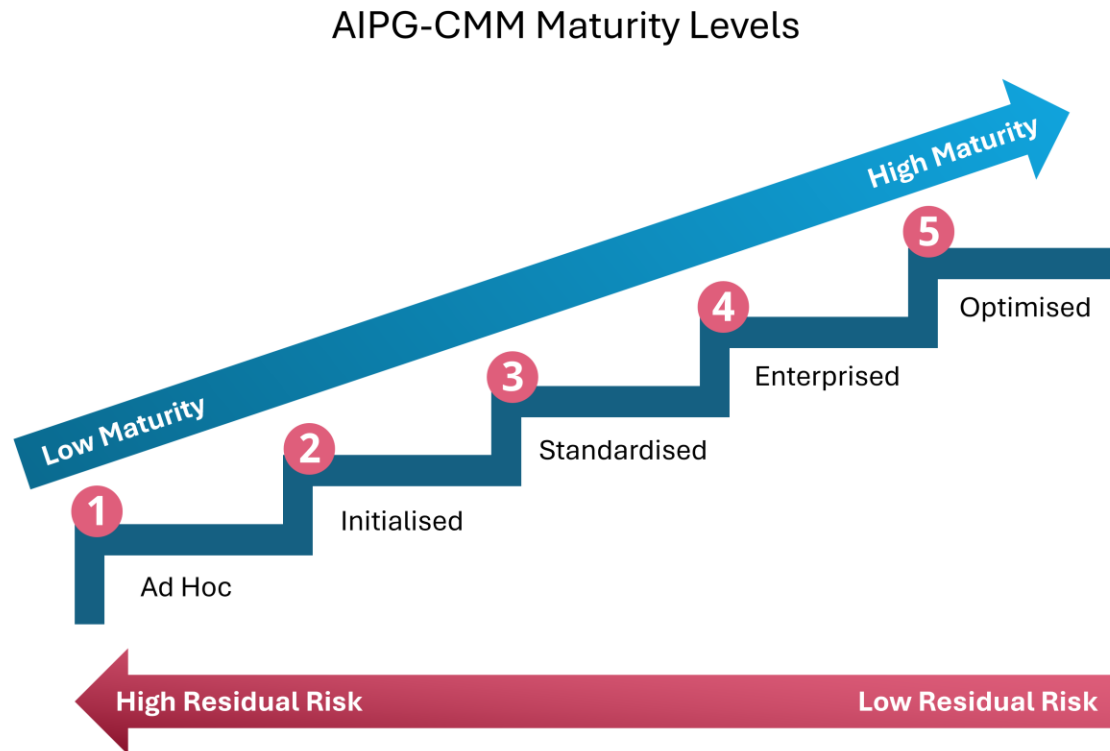

PRINCE2® and PMBOK® Mapped to AIPGF

Flexibility of the AIPGF

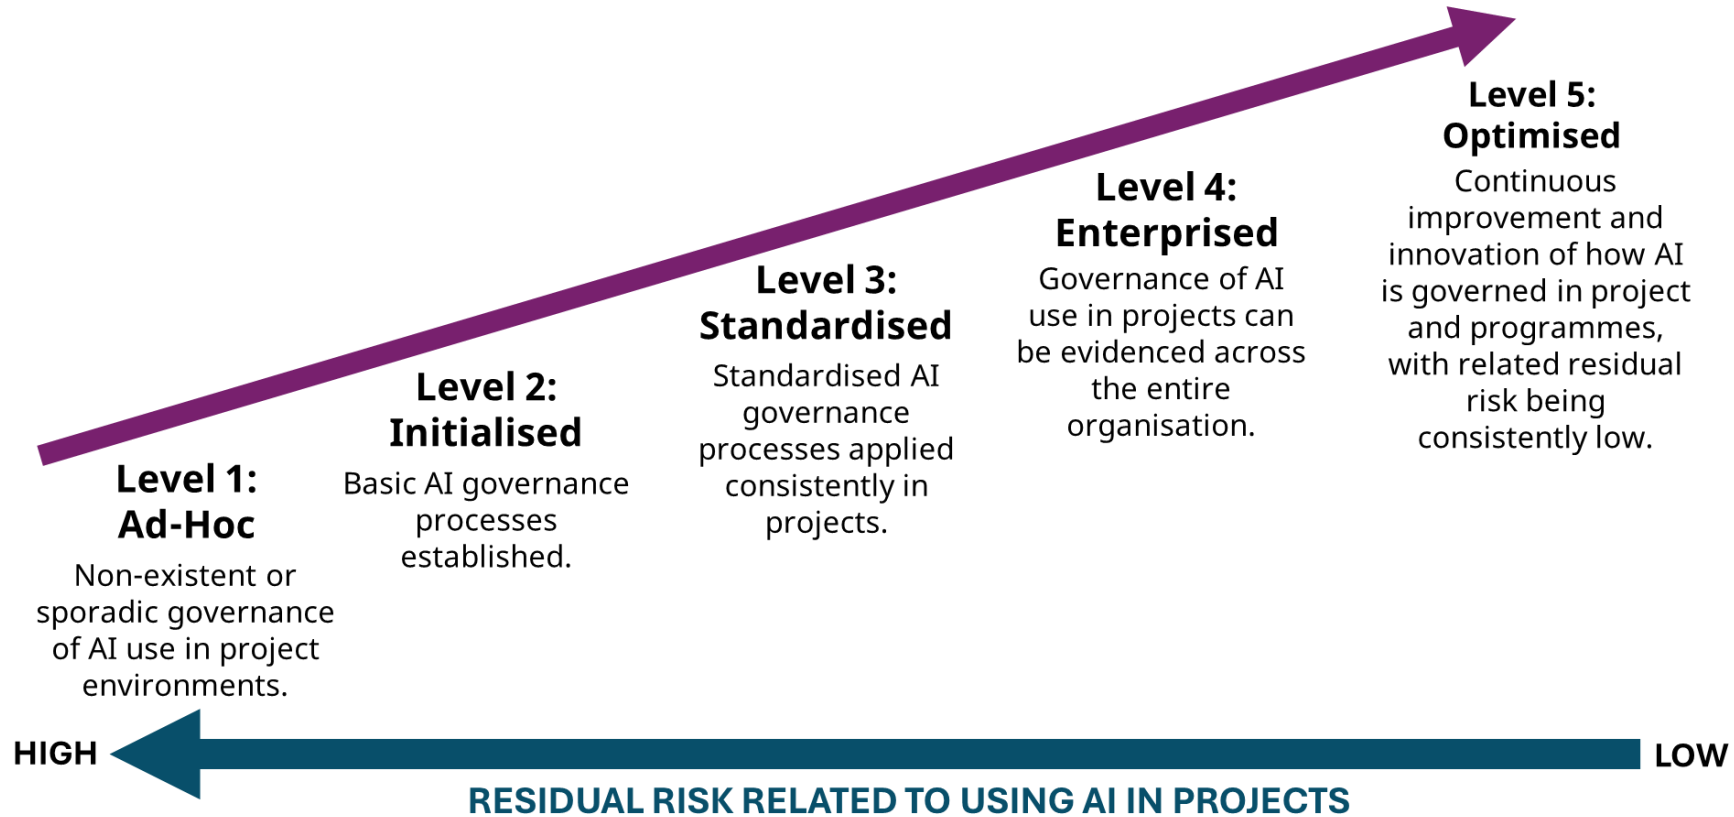

AIPGF overview

Poll 3: Where would you score your organisation's AI Governance maturity in projects?

AIPG-CMM self assessment tool: <https://aipgf.pro>

Agenda

1. Introduction to the scheme owner
2. Why AIPGF now
3. Overview of the AIPGF
- 4. Who is the AIPGF for - target audience**
5. Certification scheme
6. Q&A

Who should be AIPGF literate?

Project Portfolio and Strategic Oversight Roles

Portfolio Leaders, Strategic Programmes Office teams, Enterprise PMO Leaders, Project Sponsors and Steering Committees/Boards

Project and Programme Delivery Roles

Programme Managers, Project Managers, Change Managers, Project Coordinators, Team Members, Data Owners, Data Custodians

Governance, Assurance and Compliance Roles

Chief AI Officers, Digital Transformation Leaders, AI Ethics Advisors, Internal and External Auditors, Legal, Compliance and Regulatory Teams

Benefits to organisations and candidates

Organisations

- **Staying ahead** with AI governance in projects and programmes rather than having to **catch up when it becomes legally mandated**.
- **Evidence of project-level AI governance** will be included in internal and external audits, so may as well get to grips with it now.
- The **AIPG-CMM** (maturity benchmarking tool) will help establish “where are you now?” benchmark and **actions to move up the maturity scale**.

Candidates

- Demonstrate **leadership** and **stay ahead** in career.
- New/pivoted **career path, job security**.

Agenda

1. Introduction to the scheme owner
2. Why AIPGF now
3. Overview of the AIPGF
4. Who is the AIPGF for - target audience
- 5. Certification scheme**
6. Q&A

Certification scheme overview

FOUNDATION:

Theoretical understanding of the Framework and its elements.

PRACTITIONER:

Practical adaptation to context and continuous improvement.

Learning options with Knowledge Train

Live virtual classroom

In-house training: live virtual or on-site
